Projects

Windows Server & Active Directory Lab

Windows Server, VirtualBox

- Set up a virtualized environment with Active Directory Domain Services, configuring organizational units, user accounts, group policies, and domain-joined workstations.
- Configured DNS (forward/ reverse lookup), DHCP for automatic IP assignment, and File Server with shared folder permissions.
- Documented the full setup process in a comprehensive step-by-step guide with screenshots.

SERVE+

React, Firebase
Capstone Project

- Developing a web-based platform that gamifies service-learning and community engagement, helping students build and showcase soft skills via automated portfolios.
- Building the frontend in React with Firebase as the backend, implementing user progress tracking and security features.
